

M.Sc. (Home Science) with specialization in Clothing and Textiles

<u>Semester I</u>	Theory papers	MM	CREDIT
Paper I	- Research Methodology	100	4
Paper II	- Textile testing and quality control	100	4
Paper III	- Basic Apparel construction	100	4
Paper IV	- History of fashion & fashion design	100	4
	Practical		
	Based on Paper I, II, III, IV+ Seminar	200+25	8+1=9
	Total No. of Marks =	625	25Credit
<u>Semester II</u>			
Paper I	- Statistics and Computer application	100	4
Paper II	- Advances in textile sciences	100	4
Paper III	- Advance apparel construction	100	4
Paper IV	- Fashion designing and communication	100	4
	Practical		
	- Based on Paper I, II, III, IV+Seminar	200+25	8+1=9
	Total No. of Marks =	625	25Credits
<u>Semester III</u>			
Paper I	- Textile chemistry and processing of textiles	100	4
Paper II	- Woven fabric structures and fabric analysis	100	4
Paper III	- Knitting technology	100	4
Paper IV	- Laundry science & care of fabric	100	4
	Practical		
	Based on Paper I, II, III, IV+Seminar	200+25	8+1=9
	Total No of Marks =	625	25Credit
<u>Semester IV</u>			
Part I	Implant Training / Internship	200	7
Part II	Dissertation	200	10
Part III	Seminar and viva voce on Implant Training / Internship and Dissertation	125	4
Part IV	General Seminar	100	4
	Total No. of Marks=	625	25credit

Total No. of Credits =100

Semester I
Paper I : Research Methodology

UNIT -1 (15 Contact hour)

CREDIT-4(L-3 T-1)

Research Methodology – Meaning, objectives and types of research. Research approaches, Significance of research, Research and scientific methods, Research process and Criteria of good research.

Definition and Identification of a Research Problem – Selection of Research problem, Justification, Theory, Hypothesis, Basic assumptions, Limitations and delimitations of the problem.

UNIT -2 (15 Contact hour)

Research Design – Meaning and needs, Features of a good design; important concepts relating to research design, Variables, Experimental and Control groups, Different research designs–exploratory, descriptive and diagnostic, Hypothesis testing research. Sampling Design– Population and Sample, Steps in sampling design, Criteria for selecting a sampling procedure, Different types of sampling techniques–Probability sampling and Non-probability sampling.

Methods of Data collection–Schedules and Questionnaires, Interview, Case study, Home visits, Scaling methods, Reliability and Validity of measuring instruments.

UNIT -3 (15 Contact hour)

Concept and characteristics of a normal probability curve. Analysis of Data – Graphical and Diagrammatic presentation.

UNIT -4 (15 Contact hour)

Interpretation – Meaning of Interpretation, Technique of Interpretation, Precaution in Interpretation– Interpretation of tables and figures. Report Writing - Significance of report writing, Different steps in writing report; Types of reports, Mechanics of writing a Research Report and precautions for writing research reports. Use of Computers in Statistical Analysis – The computer system and technology, important characteristics of computer applications in researches..

Paper II: Textile Testing and Quality Control**UNIT -1 (15 Contact hour)****CREDIT-4(L-3 T-1)****Introduction**

1. Important of Textile Testing and analysis, objectives (reasons) of textile testing, Uses of Testing objectives (reasons) of textile testing, Uses of Testing information, Factors influencing Quality Control.
2. Statistical terms, use of statistic in handling data in area of textile testing
3. Sampling, terms used in sampling, fiber sampling, yarn sampling, fabric sampling

UNIT-2 (15 Contact hour)

1. Development of standard test methods, national and international organizations involved in textile testing, ISO Stds. and ISO – series
2. Precision and accuracy of testing methods, atmospheric conditions for textile testing, temperature and humidity, measurement of humidity and moisture in textile.
3. Textile properties that influence fabric performance – fiber structure, yarn structure

UNIT -3 (15 Contact hour)**Fiber Dimensions**

1. Fiber Fineness, Methods of measuring fiber fineness
2. Fiber length, Methods of measuring fiber length
3. Fiber Strength – Single fiber method, Bundle strength method

UNIT -4 (15 Contact hour)**Yarn Test**

1. Linear Density – Direct & Indirect system, folded yarns, methods of measuring linear density of yarns from packages and skeins and from a fabric sample.
2. Yarn Crimp
3. Yarn Twist – Level of twist and twist factor methods of measuring twist, yarn evenness and methods of assessing evenness
4. Yarn Strength – Single strand method skein method, count strength product (CSP)

References

1. Principles of Textile Testing – J.E. Booth, Newness Butterworth, London
2. Textile Testing and Analysis – Billie J. Collier and Helen E. Epps, Prentice Hall, New Jersey.
3. Textile Testing – John H. Skinkle, Brooklyn, New York
4. Handbook of Textile Testing and Quality Control – Groover and Hamby

5. An Introduction to Quality Control for Apparel Industry – Pradip V. Mehta, Marcel Dekker, New York.
6. Textile Objective measurement Automation in Garment Manufacture – George Stylios – Ellis Horwood Ltd, England.
7. Knitted Clothing Technology – Brackenbury Terry, Blackwell Science Ltd.
8. Textile Testing & Quality Control Standards like – BIS, BS, ASTM, ISO, AATCC, etc.
9. Any other available book on Quality Control.

Paper III: Basic Apparel Construction

UNIT-1 (15 Contact hour)

CREDIT-4(L-3 T-1)

(A)Anthropometric Measurement: Concept, importance, technique, precautions.

Pattern Making: Methods of Drafting, draping, flat pattern, techniques, use.

B)Commercial pattern: Concept, selection and use of commercial pattern.

Selection of fabrics: factors affecting the selection of fabric for different garments. Calculating amount of fabric needed for different garments.

UNIT -2 (15 Contact hour)

Lay out planning: definition, types of lay outs, economy of fabrics in placing patterns, adjusting fabric to patterns.

Fitting: Good fit, definition, Principles & clues for good fit – Ease, live, grain, set & balance.

UNIT -3 (15 Contact hour)

Different types of stitches: Construction and decorative.

Different types of seams and seam finishes.

UNIT -4 (15 Contact hour)

Fashion Design

Introduction to Fashion terminologies, concepts, its creation and analysis

1. Elements used in creating a design
2. Composition
 - With one element
 - With more than one elements
3. Color – Its sensitivity and composition in dress.
4. Harmony-in form of space coverage to design of the dress
5. Components of fashion:
 - Style, Silhouette, Details, Color, Texture, Trims

References:

- 7) Pattern Making for Fashion Designing-Armstrong, H. (1987), New York Harpes .

Paper IV: History of Fashion and Fashion Design**UNIT -1 (15 Contact hour)****CREDIT-4(L-3 T-1)****(A) History of Fashion**

Growth of the Couture: The Beginning of Dress

(B) Couture from Ancient Period (First Century B.C. to Fifth Century A.D.) Assignments to be given to students.

- Indian
- Egyptian
- Greek
- Roman
- French

UNIT -2 (15 Contact hour)**(A)** Couture from Middle Age Period (Fifth Century A.D. to 15th Century)

- Indian
- Italian
- French
- England
- Flemish & German

(B) Couture from Renaissance Period (15th Century to 18th Century)

- Indian
- Italian
- German
- French
- Spain
- England

UNIT -3 (15 Contact hour)**3 (A)** Couture from 18th Century till date

- France
- Italy
- England
- American
- Japanese

(B) Costumes of India (Past to Present)**(C)** Theories of evolution of clothing**UNIT -4 (15 Contact hour)****4. (A)** Traditional and tribal costumes of India – North, East, South, West and North-East**(B)** Traditional ornaments and jewelry of different states of India

13. Indian Costume Ghurey, G.S, Bombay Popular Prakashan, 1951
14. Costume and Textile of India-Bhushan Brij J., Bombay, D.B. Taraporwala & Co.
15. Historic Costumes-Lester R.N. Illinois. Chas A. Benette and Co.
 16. Costume Throughout the ages Ecan C.C., New York, J.B. Limancott
 - The History of Costume-Kemper Rachel H.

Practical of Semester -1**Based on papers 1,2,3,&4****Credit -8(T-8)****Paper -1**

1. Observations on general development of new born and preschoolers.
2. Rapid participatory observations with adolescent groups and families across various socio-economic status.
3. Rapid participatory observation among old people in institutions and non- institutional setups.
4. Exercises relating to preparation of research designs. Preparation of tools for data collection. Administration of these tools.

Papper -2

- 1- Fiber Testing
Fibre finess—using gravimetric method
Fibre length—(tuft length) comb sorter.
- 2- Yarn Testing

Measuring linear density of yarn from yarn package (skein method) yarn from fabric sample.

- 3- Yarn crimp in woven fabric
Yarn Twist
1) Single spun and ply yarn
2) Twist factors
- 4- Yarn evenness
Yarn strength test 1) Single strand test and
11) skein/lea strength test and CSP

Paper 3

Using Drafting Method

- 1) Gents full sleeved shirt with fusible lining
- 2) Jeans

Construct garments using following theme

Ethnic wear or party wear -

- 1) Salwar/Chudidar and Kameez/Kurta
- 2) Chaniya choli

Western or Indo-Western outfit

- 1) Trousers and Top or
- 2) Skirt and Top or
- 3) Dress

To construct a garment using commercial pattern

Paper 4

1. Preparation of models with different costumes and jewellery of
 - Indian Costumes
 - Egyptian Costumes
 - Greek Costumes

- Roman Costumes
 - American Costumes
2. Collection of photographs for traditional textiles of India & preparation of file – Jandani, Baluchar Buttiedar, Chandeni, Maheshwari, Patola, Parthiv, Himum & Amum, Kashmiri Shawl, Pochampall;
 3. Preparation of one article using embroidery and motifs of ancient linex.
 4. Visit to a museum.

Semester II**Paper I: Statistics and Computer Applications****UNIT -1 (15 Contact hour)****CREDIT-4(L-3 T-1)**

Conceptual understanding of statistical measures. Classification and tabulation of data. Measurement of central tendency, measures of variation. Frequency distribution, histogram, frequency, polygons, ogive

UNIT -1 (15 Contact hour)

Binomial distribution. Normal distribution – Use of normal Probability tables. Parametric, non-parametric tests. Testing of hypothesis, Type I and II errors. Level of significance.

UNIT -1 (15 Contact hour)

- 1.** Chi-Square test. Goodness of fit independence of attributes 2 X 2 and r X c contingency tables. Application of student 't' test for small samples. Difference in proportion for means and difference in means. Correlation, Coefficient of correlation, ranks correlation.

UNIT -1 (15 Contact hour)

- 2.** Fundamental of computer, History of computer, Generation of computer, Language, Components, Applications of Computers. Operating System & Internet: MS-DOS, MS-Windows, and Internet. MS-Office: MS-Word, MS Excel and Power Point. Introduction to Data-base Management system, Fox-Pro.

References:

4. Mehta, Versham Management Information System, Anmol Publication, New Delhi, 1998.
5. Banerjee, Utpal K. and sachdeva, R.K., Management Information System: A New Framework, Vikas Publishing House, Pvt. Ltd., New Delhi.

Paper- II: Advances in Textile Sciences**UNIT-1 (15 Contact hour)****CREDIT-4(L-3 T-1)**

Strength properties of Textile & Apparel-Terminologies and definitions like force units, Breaking strength and Tensile strength, Stress, Specific stress, Tenacity, Elongation, Strain, Extension, Extension percentage, Gauge length, Elastic recovery, Force and elongation curve. Factors affecting tensile testing, fabric characteristics affecting tensile properties, tensile testing machines and their working principles.

UNIT 2 (15 Contact hour)

Fabric Test Method –

Breaking strength – Raveled strip method, cut strip method and Grab method.

Tearing Strength – Tongue tear test, Trapezoid method, Elmendorf tear test.

Bursting strength – Hydraulic / Diaphragm bursting test Seam strength and yarn slippage in woven fabrics at seams, seam slippage tests for woven and upholstery fabrics, needle cutting in a fabric, sewability of fabrics and seam efficiency

UNIT -3 (15 Contact hour)

Fabric Stiffness, Handle and Drape –

Fabric Stiffness and Handle – Definitions, methods of measuring fabric stiffness- Shirley stiffness test, Hanging loop method Drape – definitions, methods of measuring fabric drape – drape meter.

UNIT -4 (15 Contact hour)

Crease Resistance and Crease Recovery – Definitions of terms, advantages of giving resin treatment to fabrics, fabric characteristics affecting wrinkle resistance, method of measuring crease recovery – Total test, Shirley crease recovery test, visual comparison method.

References:

1. Principles of Textile Testing – J.E. Booth, Newness Butterworth, London.
2. Textile Testing and Analysis – Billie J. Collier and Helen E. Epps, Prentice Hall, New Jersey
3. Textile Testing – John H. Skinkle, Brooklyn, New York.
4. Handbook of Textile Testing and Quality Control – Groover and Hamby
5. An Introduction to Quality Control for Apparel Industry – Pradip V. Mehta, Marcel Dekker, New York.
6. Textile Objective measurement Automation in Garment Manufacture – George Stylios – Ellis Horwood Ltd, England
7. Knitted Clothing Technology – Brackenbury Terry, Blackwell Science Ltd.

Paper III: Advance Apparel Construction

UNIT-1 (15 Contact hour)

CREDIT-4(L-3 T-1)

Cutting and making the fabric

Basic bodice block: Child and adult's, sleeve blocks – child and adult's plain sleeve block, basic fitted skirt block.

UNIT -2 (15 Contact hour)

Different type of sleeves, collars and skirts, pockets, pleats, tucks, waist bands construction (any five of each).

Different type of yokes, necklines, basic silhouettes.

UNIT -3 (15 Contact hour)

Dart Manipulation: From armhole, shoulder, neckline.
Adaptation of basic drafting to the required design.

UNIT -4 (15 Contact hour)

Pattern Alteration: Plain sleeve-length and width alteration. Plain Skirt-length alteration, alteration for prominent abdomen or hips. Width alteration – increase and decrease up to two inch and above 2 inch.

Alterations for fitting: any 15 problems of fitting with reference to shoulder, neckline, armhole, skirt and overall garments and their remedies.

Paper IV: Fashion Designing and Communication**UNIT-1 (15 Contact hour)****CREDIT-4(L- 3 T-1)**

Principles and element of art in dress designing.

Study of clothing requirements for: Special figure types – short figure, thin figure, slender figure, narrow and broad shoulder large and flat chest, large and flat hips, large abdomen, long and short neck; Special conditions – maternity, lactation, old age, physically challenged.

Sketching and dress designing for: Special figure types; Special needs/ conditions; Special purpose/occasion – at home, school, work, shopping, Birth day party, Wedding party, festival, bridal.

Developing a line of garments based on a theme (any three of following): beach wear, casual wear, sports wear, night wear, evening wear, executive wear, traditional Indian Costume.

UNIT -2 (15 Contact hour)

Fashion: Definition, history, elements, terminology, cycle, factors affecting fashion, fashion sources, fashion trends in India and abroad.

Fashion communication: need for promotion of fashion, need for the communication process, communication through different media – written, visual.

UNIT -3 (15 Contact hour)

Computer aided designing: Concept, Introduction to pattern making software, knowledge of pattern making programmes, Use of computer application, making patterns for different garments and requirements.

UNIT -4 (15 Contact hour)

Fashion Designer and his role in Fashion Industry.

Fashion Forecasting.

Understanding and sketching of theme based on fashion forecast - Sourcing of raw materials., Developing line, based on fabric and them selected., Spec sheet study, Sampling, Garment Analyses, Costing – Construction of garments, Line Presentation, Use of sale promotion material.

Study of fashion markets and its segments.

Designers – International and National. (Assignments to be given to the students)

-

-

Practical of Semester 2

Based on Paper 1,2,3,& 4

CREDIT -8(T-8)

Paper 1

Based on paper 1

Paper 2

Fabric dimension that influence its performance – Fabric length, fabric width.

Fabric Thickness and instruments used for measuring thickness of woven knits and non-woven fabrics.

Fabric count and cover factor-ends and picks per inch, Method of counting threads/inch.

Paper -3

- 1 Sample preparation: blocks – child and adult's bodice block sleeve below – child and adult's plane sleeve.
- 2 Sample preparation-different types of sleeves, pockets, pleats, tucks, waist bands (5 each)
- 3 Sample preparation – Different types of yokes, necklines (5 each)
- 4 Standardization of garments – formation of standards and their care application
- 5 Selection of textile design for apparel home furnishing other household.

Paper -4

- 1 Sheet preparation – dress designing according to theory syllabus.
- 2 Portfolio development on a special theme.
- 3 Sketching of Accessories
 - Hats and Head gear
 - Footwear
 - Bags and Purses
 - Jewelleries etc.
- 4 Developing a line of garments on a theme (any one of the following)
 - Casual wear
 - Sports wear
 - Cocktail wear
 - Executive wear
- 5 Understanding and sketching theme based on a fashion forecast.
 - Sourcing of raw materials
 - Developing line, based on fabric and theme selected
 - Spec sheet study
 - Sampling
 - Garment analysis
 - Costing – construction of garments
 - Line presentation

Use of sale promotion material

Semester III**Paper I: Textile Chemistry and Processing of Textiles****UNIT-1 (15 Contact hour) CREDIT-4 (L-3 T-1)****Polymer Chemistry: (In brief)**

1. Definition of Polymers, its types, degree and methods of polymerization, polymerization process, molecular weights of polymers and its determination.
- 2 Orientation and crystallinity of fiber molecules; their influence on the fiber properties.

UNIT -2 (15 Contact hour)**Chemistry of Cellulosic & Protein Fibers**

1. Molecular structure and Morphology of cellulose and protein fibers
2. Brief introduction on felting and shrink proofing of wool, degumming and weighting of silk.

UNIT -3 (15 Contact hour)**Dyes**

1. History of dyestuffs, light, color, dyestuffs, Structure & Use wise classification of dyes.
2. Color-Beer's law and Lambert's law, colour mixing system, colour order system, CIE color specification, Instruments for the measurement of color, Kubelka – Munk Theory, Relation between K-S & concentration of colourant, understanding Color difference, Hue, Chroma, etc. Understanding the use of Color Index Standards, dye shade cards and pantone colour coding.
4. Commercial dyes, their C.I. constitution number and their C.I. generic number, nomenclature of commercial dyes.

UNIT-4 (15 Contact hour)

Introduction on Banned dyes.

- Color Fastness: Introduction, Color fastness test, method to washing, dry cleaning, light, cracking perspiration, heat (Hot pressing)

20. History of Textile Design-Shenai, V.A. (1988), Sevak Pub.

Paper II: Woven fabric structure and fabric analysis**UNIT-1 (15 Contact hour) CREDIT-4(L-3 T-1)**

- a) Yarn and their Characteristics – Continuous Filament and Spun Yarns, Uniformity, Smoothness and luster, Resistance to flattening, Fibre and yarn strength, Fibre density shape and crimp, Bulked and textured yarns, Core spun and stretch yarns
- b) Yarn count (Single and folded or ply yarns) – different numbering systems, resultant count, yarn diameter, yarn twist and its influence on woven structure.

UNIT-2 (15 Contact hour)

Cloth Calculations – Factors involved in cloth calculations - Calculation of weight of Warp & Weft calculation, Quantity of material required for a piece (Grey fabric, bleached and dyed fabric), per linear and square meter.

UNIT -3 (15 Contact hour)

- a) Brief Study of Preparatory Machines – Cone and cheese winding machine, Pirn winding, Beam warping machine, sizing machines and the different yarn packages with their characteristics

UNIT -4 (15 Contact hour)

Weaving Looms – Brief introduction to working of the following looms - Brief introduction to working of the following looms – Tappet, Dobby, Jacquard, Shuttle less looms (projectile, rapier, water jet, air jet and circular loom) – Basic operations in weaving (Sedding, picking, beating, takp up, let off), Drawing in knotting and denting plans.

14. Textiles – Fibre to Fabric – B.P. Corbman
15. Textiles 3rd edition – N. Hollen and J. Saddler
16. Handloom weaving technology – Allen Fannin, Van Nostrand

Paper III: Knitting Technology**UNIT-1 (15 Contact hour)****CREDIT-4(L-3 T-1)**

Introduction to knitting, knitted construction, History of knitting.

UNIT -2 (15 Contact hour)

Classification of knitted fabrics – woft knitting, warp knitting, Jacquard knitting, Pile knitting, Production of pile knit, Milanese knit, Simplex knit, Raschet knit, ketten Raschel Knit.

UNIT -3 (15 Contact hour)

Yarns used for Hosiery, Types of Hosiery construction, Full – Fashioned Hosiery, Sheerness of Hosiery, Construction of Hosiery, Circular – Knit Hosiery, Women’s Nylon Hosiery

UNIT -4 (15 Contact hour)

Men’s, Children’s and infant’s hosiery. Dyeing of Hosiery .Care of Hosiery.

Reference:

1. Geotextiles Handbook – T.S. Iyold and K.S. Iyold and K.S. Miller, Thomas, Telford.

4. Handloom weaving technology – Allen Fennons V. An Nostrand..

Paper IV: Laundry Science and Care of fabric**UNIT -1 (15 Contact hour)****CREDIT-4(L-3 T-1)**

Laundry Science: Stains – Classification and methods of removal; Soaps and detergents – Composition, manufacturing, application, merits and limitations.

UNIT -2 (15 Contact hour)

Whitening agents: Types and Functions. Dry cleaning agents, methods, advantage disadvantage.

UNIT -3 (15 Contact hour)

Fabric finishing Method - Singeing or grassing, Bleaching, Mercerising, Slack Mercerizing, shrinking, Tentering, Crabbing, Decating, Stiffening, Weighting, calendaring, Schreinerling, Embossing, Moireng, Cireing, Beetling, Napping, Gigging, Shearing.

UNIT -4 (15 Contact hour)

Special Purpose Finish – Water repellency, Waterproofing, flame proofing, Moth proofing, Mildewproofing, Anti bacterial finishes, Slip resistance, Heat-reflectant finishes, Foam Laminating, and Fabric Bonding.

7. Grosicki, Z. Watson's 1988. Textiles Design and Color. Universal Publishing Corporation, Bombay.

Practical of Semester 3

Based on Paper 1,2,3,& 4

CREDIT -8(T-8)

Paper-1

1. Qualitative – Identification of fibers – cotton, polyester, viscose, Polyamide, silk, wool, jute, tencel and others. Use of burning, microscopic, chemical tests.
2. Desizing, scouring and bleaching of grey fabric using chemical and eco-friendly agents.
3. Dyeing of cotton with direct dye by exhaust method
4. Dyeing of wool and silk with acid dye by exhaust method.
5. Use of natural dyes and mordents (Synthetic & natural) to dye cotton, silk and wool.
6. Printing on cotton fabric with reactive dyes and pigment, Printing on silk with acid dyes.

Paper 2

- 1 Analysis of different woven sample studied in theory for design, repeat, draft, .
peg plan and other details, on inch graph paper.
- 2 Creating stripes, Checks and colour and weave effects on inch graph paper.
.
- 3 Creating suitable design repeat for dobby and jacquard looms on graph paper.
.
- 4 Setting of table loom/sample loom and weaving the following weave samples –
. plain, basket, rib, satin, twill and twill based, herringbone, diamond, honeycomb, mockleno.
Color and weave effect designs, and any other fancy weaves.

Paper 3

1. Sample knitting – Purl Knit, Tricot knit, Rib Knit, Jacquard knit, Pile Knit.
2. Knitting one baby garment (set)
3. Knitting, socks, Hand gloves.
4. Knitting one adult.
5. Female and male garment.

Paper 4

1. Removal of strains on cellulose, silk and synthesis
2. Evaluation of efficiency of common.
 - a. Soaps and detergents
 - b. Bleaching agents

- c. Optical brightness
- d. Sizing materials
- 3. Dyeing of different textiles using different dyes:
 - a. Cellulosic fabric
 - b. Protein fabric
 - c. Man Made fabric
