

Department of Zoology report (2024-2025) on SDGs and their fulfilment

The Department is engaged in social, cultural, and environmental activities to enhance the participation of students, teachers, employees, and community members in milestones that reflect our university's integrated, data-driven approach to achieving environmental targets. In this direction, the department is making sound efforts to provide solutions through education. These are mainly related to skill and ability enhancement courses, organising courses in fish farming and aquaculture, vermicomposting, and sericulture to promote a self-sustaining life and increase employment. The department is collaborating with the university to enhance green cover to sequester carbon and improve environmental cleanliness.

SDG	Goal	Program organized
SDG 01	No Poverty	Skill enhancement and ability enhancement course
SDG 03	Good health and well-being	Enhancement of the participation of students in yoga and health care, lectures on the control of cervical and gastric cancer
SDG 04	Quality Education	Counselling of graduate students for better learning, and alumni meet.
SDG 9 -11	Zero Hunger	Value added course in fish farming and aquaculture
SDG 13	Climate Action	Plantation of saplings in the garden
SDG 15	Life on Land	Organised programs on World Ozone Day and Earth Day
SDG 17	Partnerships for the Goals	MoU signed with other institutes, social and cultural activities

* Our department allows talented students, who may be from economically weaker sections of society, to gain practical experience and financial stability while studying, fostering career readiness. For this purpose, students are allowed to participate in employment-related training courses, fieldwork, workshops, and internship programs at other institutions, universities, and industry.
